EDUCATION

Madan Mohan Malaviya University of Technology

B.Tech. in Information Technology | CGPA: 9.13 / 10.00

Gorakhpur, UP

Aug 2024 – May 2028 (Expected)

Gautam Valley Public School

Intermediate (XII), CBSE | Percentage: 92.00 / 100.00

Varanasi, UP

2024

St. Thomas International School

High School (X), CBSE | Percentage: 95.40 / 100.00

Varanasi, UP

2022

RELEVANT COURSEWORK

Data Structures | Algorithms | Software Engineering | Operating Systems | Computer Networks | Database Management Systems | Object-Oriented Programming | Computer Architecture

PROJECTS

SnapShare — AI-Powered Temporary Photo Sharing Platform | Live | GitHub

2026

Next.js 15, TypeScript, Supabase, Cloudinary, Gemini API, face-api.js, cron-job.org, Tailwind CSS, Vercel

- Built a full-stack temporary photo-sharing platform enabling users to instantly create event-based rooms and upload photos through QR-code access without authentication or app installation.
- Designed a scalable media pipeline with client-side image compression, optimized Cloudinary uploads, lazy-loaded masonry galleries, fullscreen previews, and bulk ZIP downloads for efficient handling of large image collections.
- Integrated AI-powered content moderation using Gemini Vision to automatically validate uploaded images before storage, improving platform safety and upload reliability.
- Implemented browser-side face detection and clustering using **face-api.js** with a custom DBSCAN clustering algorithm to automatically group photos of the same person into dedicated albums.
- Built intelligent room automation features including AI-generated room titles, automatic people-cluster naming, and AI-generated event recap summaries after room expiration.
- Developed secure backend APIs and room-based workflows using Next.js App Router, including protected cleanup cron jobs, secure deletion flows, and automated 24-hour room lifecycle management.
- Enhanced user experience with live room expiry countdowns, downloadable/shareable QR codes, responsive mobile-first UI, and real-time photo visibility across devices.

Crypto Hunter — Real-Time Cryptocurrency Tracking Platform | Live | GitHub

2025

React 19, Vite, Firebase Authentication, CoinGecko API, Chart.js, Tailwind CSS, Material UI, Vercel

- Developed a responsive cryptocurrency tracking platform delivering real-time market data including live prices, trading volumes, and market capitalization for multiple digital assets.
- Integrated CoinGecko APIs using Axios to fetch dynamic cryptocurrency data and implemented search, pagination, and currency-switching workflows for efficient market exploration.
- Built interactive historical price visualization dashboards using Chart.js, enabling users to analyze cryptocurrency trends across multiple time ranges with dynamic chart updates.
- Implemented secure Google Authentication using Firebase Authentication for protected user access and personalized application workflows.
- Designed a modern mobile-first user interface using Tailwind CSS and Material UI, including trending cryptocurrency carousels and responsive multi-device layouts.

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, Python, C++

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Redux

Backend & APIs: Node.js, Express.js, Hono, REST APIs, JWT Authentication, Cookie-Based Authentication, Zod Validation

Databases & ORM: PostgreSQL, MongoDB, Redis, Supabase, Prisma ORM

DevOps & Cloud: Docker, Docker Compose, Cloudflare, Vercel, Git, GitHub

AI / ML Integration: Gemini API, face-api.js, AI Content Moderation, Facial Clustering

Developer Tools: VS Code, Postman, Cloudinary, Nodemailer, Linux (Ubuntu)

Concepts & System Design: Rate Limiting, DDoS Protection Concepts, CAPTCHA Systems, Pub/Sub Architecture, Caching, Scalable System Design

Core CS Fundamentals: Data Structures, Algorithms, OOP, DBMS, Operating Systems, Computer Networks

ACHIEVEMENTS & COMPETITIVE PROGRAMMING

ICPC Preliminary Round 2025 | AIR 1107 | University Rank 03 / 16

- Participated in a 3-member team solving challenging algorithmic problems under strict time constraints.

Codeforces | Newbie | Max Rating: 992

- Solved 113+ problems; achieved Global Max Rank 10295 / 32000 in Codeforces Round 1054.

CodeChef | 2-Star | Max Rating: 1440

- Solved 140+ problems; achieved Global Max Rank 1732 / 25000 in Starters 210.

LeetCode | Rating: 1426

- Solved 465+ problems; achieved Global Max Rank 13725 / 30344 in Biweekly Contest 164.

LEADERSHIP & TEAMWORK

Team Lead — ICPC Preliminary Round 2025

- Led a 3-member team (Syntax010), applying strong problem-solving, debugging, and edge-case validation under strict time constraints; secured AIR 1107.

I-Expo Competition

- Secured 1st rank by demonstrating teamwork, algorithmic thinking, and efficient solution validation.
